

Closing Apps in Apple Devices with iOS7

1. Push the Home Button twice really fast to bring up the Task Manager.

2. Slide to the sides to locate a particular application you wish to turn off and once you locate it, just slide the image of it towards to top of the screen and this will stop this one application. You can turn off all of them if you wish to and also turn off more than one by sliding two at the same time towards the top of the screen.
